Dear Fiserv Hiring Team,

I am writing to express my strong interest in the DevOps Engineer position at Fiserv. With 3+ years of experience designing, building, and maintaining CI/CD pipelines for multiple environments, I am well positioned to take personal ownership and accountability for delivering assigned tasks and deliverables within established schedules.

My experience aligns closely with this role. I design, build, and maintain CI/CD pipelines using Git, GitHub Actions, Bamboo/Jenkins, Maven/Ant, and Artifactory. I have strong experience with the AWS cloud platform including EKS, EC2, RDS, S3, Route53, IAM, ELB, API Gateway, and CloudWatch, and I manage and optimize deployments on AWS. I have expertise in CI/CD tools including Jenkins, GitLab CI, ArgoCD, and Azure DevOps. I am proficient in containerization with Docker and orchestration with Kubernetes, including Helm package management for OpenShift/Kubernetes deployments. I automate infrastructure provisioning using IaC tools such as Terraform and Ansible, and I ensure system reliability, scalability, and security across environments. I bring strong scripting skills in Python, Bash, and PowerShell, and experience with monitoring and logging tools including Prometheus, Grafana, and ELK.

I have Linux operating system experience, knowledge of security best practices in cloud and DevOps, and knowledge of integration and unit test and Behavior Driven Development. I am ready to work 24*7 for any technical support required as a DevOps person, and I continuously improve deployment plans to automate activities and make them efficient. I stay updated with emerging DevOps tools and practices, and I bring good problem-solving skills and knowledge of serverless computing and event-driven architecture.

I am confident my DevOps background, AWS and Kubernetes expertise, CI/CD pipeline experience, and automation mindset make me the right fit for Fiserv's DevOps Engineer role.

I look forward to discussing how I can contribute to Fiserv's DevOps team.

Best regards,
Ishwar Kalmegh
