MBS Global Hiring Team
MBS Global

Application for DevOps Engineer — Bengaluru

Dear MBS Global Hiring Team,

I am writing to express my strong interest in the DevOps Engineer position at MBS Global. With hands-on experience building CI/CD pipelines using Jenkins, GitHub Actions, GitLab CI, and Azure DevOps, managing infrastructure on AWS, Azure, and GCP with Terraform, and containerizing and orchestrating applications with Docker and Kubernetes, I am excited by the opportunity to contribute to MBS Global's projects with global clients.

My experience aligns well with MBS Global's focus on reliable, scalable, and secure infrastructure. I have strong Linux administration skills and proficiency in Shell, Python, and Bash scripting for automation. I am experienced with Git version control, CI/CD pipeline design, Docker containerization, Kubernetes orchestration, and monitoring tools such as Prometheus, Grafana, ELK, Datadog, and CloudWatch. I also have exposure to DevSecOps practices and networking basics including DNS, load balancers, and SSL/TLS.

What particularly attracts me to MBS Global is the opportunity to work on DevOps projects for global clients across multiple cloud platforms. I am eager to bring my CI/CD, IaC, container orchestration, and cloud administration experience to help deliver reliable and scalable infrastructure for your clients.

I am confident that my experience with Jenkins, GitHub Actions, Terraform, AWS/Azure/GCP, Docker, and Kubernetes, combined with my commitment to reliable and secure infrastructure, makes me a strong fit for this role. I look forward to the possibility of discussing how I can contribute to MBS Global's engineering team.

Best regards,

Ishwar Kalmegh
