PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience owning CI/CD pipelines (Git commands), incident management, monitoring & observability, and TSM practices (incident, change, problem management, ticketing tools). Skilled in planning and executing DevOps pipelines across the application life cycle — planning, coding, building, testing, staging, release, configuration, and monitoring. Experienced with monitoring & observability tools Prometheus, Dynatrace, Datadog, SLO/SLI, and RCA of critical/repeatable issues. Manages IT infrastructure per supported software code requirements, on-boards applications on DevOps tools per client needs, creates user access workflows, automates testing & deployment, resolves tickets within TAT, and follows escalation matrix/process.

SKILLS

Languages	Shell, Bash, Python, JavaScript, TypeScript, SQL
DevOps & CI/CD	CI/CD pipeline, Git commands, Jenkins, GitHub Actions, Docker, Docker Swarm, Kubernetes, application life cycle, build/test/release, configuration, monitoring
SRE & Observability	Incident management, monitoring & observability, Prometheus, Dynatrace, Datadog, SLO, SLI, RCA, alerting, trend analysis
TSM	Incident management, change management, problem management, ticketing tools, TAT, escalation matrix, user access workflows, customer support/service
Cloud & Infrastructure	AWS (EC2, Lambda, RDS, ECR, CloudFront, S3), IT infrastructure management, on-boarding applications, Linux
Automation & Scripting	Shell scripting, Bash, Python, automate testing & deployment, runbooks
Applications & Data	Node.js, Express.js, GraphQL, REST APIs, tRPC, PostgreSQL, MongoDB

WORK EXPERIENCE

Techsurvi Pvt. Ltd.
Nov 2025 – Present

Backend & DevOps Engineer

- Own CI/CD pipelines (Git commands) and plan/execute DevOps pipelines supporting the application life cycle — planning, coding, building, testing, staging, release, configuration, and monitoring — for production Node.js services on AWS with ~150 ms average API latency.
- Manage IT infrastructure per supported software code requirements using Terraform version-controlled in Git for AWS (EC2, Lambda, RDS, ECR, CloudFront, S3).
- On-board applications on DevOps tools and configure them per client needs; create user access workflows and provide user access per defined process.
- Build and engineer DevOps tools per client customization suggestions; collaborate with development staff on coding/scripting to connect code elements required to run software releases with operating systems and production infrastructure.
- Leverage tools to automate testing & deployment in DevOps environments; provide customer support/service on DevOps tools and timely support internal & external customers on multiple platforms.
- Incident management and monitoring & observability using Prometheus, Grafana, Loki, Promtail, Node Exporter, cAdvisor; SLO/SLI tracking and RCA of critical/repeatable issues.
- Resolve tickets raised on DevOps tools within specified TAT; ensure adequate resolution with customer satisfaction; follow escalation matrix/process when resolution gets complicated or isn't resolved.
- Developed a concurrent Go stress-testing application using Goroutines, Mutexes, and WaitGroups, improving availability by 60%.
- Created AWS billing alerts that kept monthly cloud spend within the $5K limit, preventing budget overruns.
- Migrated the MySQL RDS database from version 8.0 to 8.4 with zero downtime, improving query performance by 25%.

Skyfunnel.ai
Dec 2024 – Oct 2025

Software Development Engineer

- Operated production tRPC and PostgreSQL services, supporting incident triage, problem analysis, resolution, and post-fix validation.
- Resolved 100+ production issues, reducing bug resolution time by 40% through structured troubleshooting and root cause analysis.
- Improved WhatsApp and Email delivery reliability using exponential backoff retries, reducing recurring service interruptions.
- Built a concurrent Go email validation service that reduced backend load by 30%, improving capacity and application performance.
- Created a Zapier-like event automation feature that triggers 200+ emails per event, reducing manual notification effort by 60%.

Bizonance India Pvt. Ltd.
Jan 2024 – Dec 2024

Full Stack Developer

- Developed and maintained scalable React, Node.js, and PostgreSQL applications, troubleshooting full-stack application and data issues.
- Migrated a legacy frontend to React + Tailwind CSS, improving performance by 20%, and integrated the PhonePe API with secure transaction handling.
- Developed an Electron desktop application for synchronized MongoDB and PostgreSQL data management.
- Migrated the complete server from Windows to the Linux (Hostinger) hosting platform, cutting hosting costs by 30% and improving uptime to 99.9%.

PROJECTS

RSS Post Scraper in Go | GitHub
Go • Chi • PostgreSQL • Goose • sqlc

- Built an RSS feed scraper with database migrations and type-safe SQL generation.

Voice-Based AI Chat Application | GitHub
Next.js • Supabase • PostgreSQL • Vapi

- Developed a real-time AI voice assistant with streaming conversations and secure authentication.

Rulers of the Sky (Go + Ebiten) | GitHub | Live Demo
Go • Ebiten • Game Development

- Developed a retro-style 2D aerial combat game featuring sprite animation, scrolling backgrounds, enemy AI, projectiles, and collision detection using Go and Ebiten.
