PROFESSIONAL SUMMARY

Senior Software Engineer with 3+ years of experience owning complex production systems and leading technical initiatives from problem definition through production operation. Skilled in designing secure, reliable, and scalable distributed systems with clearly defined trust boundaries, balancing security, privacy, performance, reliability, and usability. Strong proficiency in **Go**, **Rust**, and **Python**, with deep expertise in **systems engineering**, **distributed systems**, **security engineering**, and **backend platforms**. Strong understanding of **concurrency**, **networking**, **storage**, **APIs**, and **operational observability**. Experience managing **cloud infrastructure** on **AWS**, **GCP**, and **Azure**. Foundational understanding of **AI/ML** technologies and experience leveraging AI-driven solutions. Mentors engineers through design and code reviews; thrives in ambiguity and fast-paced, high-trust team environments.

SKILLS

Languages	Go (Golang), Rust, Python, Java, JavaScript, TypeScript, Bash, SQL
Systems & Distributed Platforms	Systems engineering, distributed systems, backend platforms, concurrency, networking, storage, APIs, operational observability, scalability, reliability
Security & Privacy	Security engineering, trust boundaries, security policy, privacy requirements, secure system design, GDPR-compliant systems
Cloud Infrastructure	AWS, GCP, Azure, cloud infrastructure management, cloud-native services
AI/ML	AI/ML technologies, AI-driven solutions, AI applications, AI security, operational efficiency
Containers & Orchestration	Docker, Kubernetes, containerized workloads
CI/CD & Automation	GitHub Actions, Jenkins, Git, CI/CD pipelines
Applications & Data	Node.js, Express.js, GraphQL, REST APIs, tRPC, PostgreSQL, MongoDB, MySQL

WORK EXPERIENCE

Techsurvi Pvt. Ltd.
Nov 2025 – Present

Senior Software Engineer

- Own complex **production systems** and lead technical initiatives from problem definition through implementation, rollout, and production operation for **Node.js** (**Express**, **GraphQL**) applications on **AWS** with ~**150 ms** average API latency.
- Design **secure, reliable, and scalable distributed systems** with clearly defined **trust boundaries**, balancing **security**, **privacy**, performance, reliability, and usability.
- Build **backend platforms** and **microservices** using **Go** and **Python**, with containerization via **Docker** and orchestration via **Kubernetes** on **AWS** (**EC2**, **Lambda**, **RDS**, **ECR**, **CloudFront**, **S3**).
- Manage **cloud infrastructure** on **AWS**; apply strong understanding of **concurrency**, **networking**, **storage**, **APIs**, and **operational observability**.
- Lead complex investigations, improve engineering practices, testing, and operational readiness; mentor engineers through design and code reviews.
- Create event-driven architecture using **AWS** (**Lambda**, **SQS**, **API Gateway**), handling 10K+ requests/day and reducing latency by **40%**.
- Develop a concurrent **Go** stress-testing application using Goroutines, Mutexes, and WaitGroups, improving availability by **60%**.
- Create **AWS** billing alerts that kept monthly cloud spend within the **$5K** limit, preventing budget overruns.
- Migrate the **MySQL RDS** database from version **8.0** to **8.4** with zero downtime, improving query performance by **25%**.

Skyfunnel.ai
Dec 2024 – Oct 2025

Software Development Engineer

- Operated production **tRPC** and **PostgreSQL** services, supporting incident triage, problem analysis, resolution, and post-fix validation.
- Resolved **100+ production issues**, reducing bug resolution time by **40%** through structured troubleshooting and root cause analysis.
- Improved **WhatsApp** and **Email** delivery reliability using exponential backoff retries, reducing recurring service interruptions.
- Built a concurrent **Go** email validation service reducing backend load by **30%**.
- Created a Zapier-like event automation feature that triggers **200+** emails per event, reducing manual notification effort by **60%**.

Bizonance India Pvt. Ltd.
Jan 2024 – Dec 2024

Full Stack Developer

- Developed scalable applications using **React**, **Node.js**, and **PostgreSQL**.
- Migrated legacy frontend to **React** + **Tailwind CSS**, improving performance by **20%**.
- Integrated the **PhonePe API** with secure transaction handling.
- Developed an **Electron** desktop application for synchronized **MongoDB** and **PostgreSQL** data management.
- Migrated the complete server from Windows to the Linux (Hostinger) hosting platform, cutting hosting costs by **30%** and improving uptime to **99.9%**.

PROJECTS

RSS Post Scraper in Go | GitHub
Go • Chi • PostgreSQL • Goose • sqlc

- Built an RSS feed scraper with database migrations and type-safe SQL generation.

Voice-Based AI Chat Application | GitHub
Next.js • Supabase • PostgreSQL • Vapi

- Developed a real-time AI voice assistant with streaming conversations and secure authentication.

Rulers of the Sky (Go + Ebiten) | GitHub | Live Demo
Go • Ebiten • Game Development

- Developed a retro-style 2D aerial combat game featuring sprite animation, scrolling backgrounds, enemy AI, projectiles, and collision detection using **Go** and **Ebiten**.
