Cover Letter — Cloud Platform & DevOps Engineer (Asset Vantage, Pune)

Dear Hiring Manager,

I am writing to apply for the Cloud Platform & DevOps Engineer position at Asset Vantage in Pune. With 3+ years of experience designing, implementing, and operating secure, scalable, and reliable cloud platforms on AWS, I am confident I can contribute to your platform engineering and DevSecOps initiatives.

At Techsurvi Pvt. Ltd., I built event-driven architecture using AWS Lambda, SQS, and API Gateway handling 10K+ requests/day and reducing latency by 40%. I created AWS billing alerts keeping monthly cloud spend within a $5K limit, supporting cloud-cost governance with FinOps. I migrated MySQL RDS from version 8.0 to 9.7 with zero downtime, improving query performance by 25%. I built a GDPR-compliant webhook system using SQS, Lambda, and EventBridge processing 5K webhooks/day with dead-letter handling and replay strategy. I also built CI/CD pipelines using Docker, GitHub Actions, and Jenkins-compatible workflows, and implemented monitoring and alerting using Prometheus, Grafana, Loki, Promtail, Node Exporter, and cAdvisor.

I bring hands-on experience with AWS IAM, Security Groups, VPC, EKS/Kubernetes, ECS/Fargate, S3, Route 53, and Lambda, along with Amazon Cognito (user pools, identity pools, MFA, OAuth/OIDC, JWT, RBAC), CI/CD (Jenkins, Bitbucket Pipelines, GitHub Actions), IaC (Terraform, CloudFormation, AWS CDK), Docker/Kubernetes, and DevSecOps practices including VAPT remediation, vulnerability management, and SOC2 audit evidence. I have experience with CloudWatch, Grafana, and Linux networking/scripting with Python and Bash.

At Skyfunnel.ai, I led incident response and root-cause analysis, reducing bug resolution time by 40%, and created a Zapier-like event automation feature that triggered 200+ emails per event, reducing manual notification effort by 60%. At Bizonance India Pvt. Ltd., I migrated a complete server from Windows to Linux (Hostinger), cutting hosting costs by 30% and improving uptime to 99.9%.

I am passionate about mentoring junior engineers, defining engineering standards, and driving continuous improvement. I would welcome the opportunity to discuss how my experience building secure cloud platforms aligns with Asset Vantage's needs. Thank you for your consideration.

Sincerely,
Ishwar Kalmegh
