7 October 2026
Hiring Team, Citi
Chennai, Tamil Nadu, India

Dear Hiring Team,

I am writing to apply for the **Full Stack Java Developer (Junior)** role. As a full-stack engineer with 3+ years of professional experience building enterprise-grade applications, I am excited by the opportunity to deliver end-to-end solutions with Angular on the frontend and Java/Spring Boot microservices on the backend for Citi's platforms.

My experience aligns closely with the requirements of this role:

- **Frontend:** Built responsive, modular interfaces with Angular, TypeScript, HTML5/SCSS, and state management using RxJS/NgRx, with a focus on performance and accessibility.
- **Backend:** Designed and implemented RESTful APIs and microservices with Java (Spring Boot/MVC/Data/Security) following clean architecture and secure coding practices.
- **Data & Integration:** Modeled data and optimized queries on PostgreSQL/Oracle using Hibernate/JPA, and implemented event-driven integrations with Apache Kafka and RabbitMQ.
- **DevOps & Testing:** Containerized services with Docker, deployed to Kubernetes/OpenShift via CI/CD, and maintained quality gates with JUnit, Mockito, Jasmine, and Cypress alongside SonarQube/SAST remediation.

I work effectively in Agile/Scrum teams, value constructive code reviews, and enjoy collaborating across the stack to deliver reliable, compliant software. I am confident I can contribute to Citi's engineering goals from day one and grow within your team.

Thank you for your time and consideration. I look forward to discussing how I can contribute.

Sincerely,

Ishwar Kalmegh
