Hiring Team, Deutsche Bank
Pune, India

Dear Hiring Team,

I am writing to apply for the **IT Application Owner (ITAO), AVP** role in Pune. As an application and compliance-focused professional with 3+ years of experience in a global IT organization, I am excited by the opportunity to own application compliance and operational readiness across the full lifecycle.

My experience aligns closely with the responsibilities of this role:

- **Application Ownership & Compliance:** Acted as the primary contact for application-related requests, managing IT and information security attestations, and owning the backlog of IT management and compliance tasks through to remediation.
- **Disaster Recovery & Patching:** Coordinated DR and patching activities, maintained operational readiness, and ensured applications complied with internal policies, standards, and KPIs.
- **Risk, Audit & Governance:** Supported risk identification and audit remediation, tracked issues to closure, and contributed to change, incident, and problem management using ITIL practices.
- **Stakeholder & Project Management:** Managed multiple stakeholders across Business, Security, Development, QA, IT Support, and external Vendors, keeping multiple work streams on track and communicating clearly at all levels.

I bring a technical grounding in servers, storage, networking, databases, UNIX/Windows, and cloud (GCP/AWS), along with strong analytical and communication skills and experience leveraging AI tools to optimise workflows responsibly. I am confident I can manage compliance and reduce risk for your applications from day one.

Thank you for your time and consideration. I look forward to discussing how I can contribute.

Sincerely,

Ishwar Kalmegh
