PROFESSIONAL SUMMARY

Cloud Developer with 3+ years of experience building and maintaining cloud application modules for production systems in **Python**, **Golang**, and **JavaScript**. Builds **microservices** that run as **containers** on **Kubernetes** in hybrid deployments across **AWS** and **Azure**, and has hands-on **KVM** and **OpenVZ** virtualization experience. Comfortable owning a feature from specification to shipped release: designing **test plans**, automating test cases, deploying code, debugging production issues, and instrumenting services with **Prometheus** and **Grafana**. Delivers through **CI/CD** pipelines on **GitHub Actions**, works comfortably across teams to unblock delivery, and picks up unfamiliar technologies quickly.

SKILLS

Languages	Python, Go, TypeScript, JavaScript, Bash
Cloud Platforms	AWS (EC2, Lambda, RDS, ECR, CloudFront, S3), Azure, hybrid and multi-cloud deployments
Containers & Orchestration	Docker, Docker Swarm, Kubernetes, microservice architecture, containerized deployments
Virtualization	KVM, OpenVZ, Linux virtualization for on-prem and hybrid environments
CI/CD & DevOps	GitHub Actions, CI/CD pipelines, Git, Linux, environment configuration, release and rollback
Backend & APIs	Node.js, Express.js, GraphQL, REST APIs, tRPC, JWT, OAuth, webhooks
Databases	PostgreSQL, MongoDB, Prisma, Mongoose, schema migrations, type-safe SQL, MySQL
Testing & Debugging	Test plan design, automated unit and integration test suites, test script authoring, debugging and root cause analysis
Observability	Prometheus, Grafana, Loki, Promtail, Node Exporter, cAdvisor

WORK EXPERIENCE

Techsurvi Pvt. Ltd.

Nov 2025 – Present

Backend & DevOps Engineer

- Developed and maintained cloud application modules for a **Node.js** (**Express**, **GraphQL**) backend running on **AWS** (**EC2**, **Lambda**, **RDS**, **ECR**, **CloudFront**, **S3**), holding average API latency at **150 ms** and shipping features against defined specifications.
- Containerized services with **Docker** and deployed them to a **Kubernetes** cluster following **microservice** patterns, with **CI/CD** pipelines built on **GitHub Actions** for automated build, test, and release.
- Designed test plans and automated unit and integration test cases for owned modules, and debugged production defects through root cause analysis and production monitoring.
- Implemented centralized monitoring and alerting using **Prometheus**, **Grafana**, **Loki**, **Promtail**, **Node Exporter**, and **cAdvisor**.
- Built a concurrent **Python** and **Golang** stress-testing and email validation service using goroutines, **Mutexes**, and **WaitGroups**, improving availability by **60%** and reducing backend load by **30%**.
- Created event-driven architecture for a client using **AWS** (**Lambda**, **SQS**, **API Gateway**), handling 10K+ requests/day and reducing latency by **40%**.
- Created **AWS** billing alerts that kept monthly cloud spend within the **$5K** limit, preventing budget overruns.
- Migrated the **MySQL RDS** database from version **8.0** to **8.4** with zero downtime, improving query performance by **25%**.
- Created a **GDPR**-compliant webhook system using **SQS**, **Lambda**, and **EventBridge**, processing 5K webhooks/day with dead-letter handling and replay strategy.

Skyfunnel.ai

Dec 2024 – Oct 2025

Software Development Engineer

- Developed production backend services and **REST** APIs using **tRPC** and **PostgreSQL**, covered by automated test suites.
- Debugged and resolved **100+** production issues, reducing bug resolution time by **40%** through systematic debugging and documented root causes.
- Enhanced **WhatsApp** and **Email** delivery using exponential backoff retry mechanisms and idempotent request handling.
- Built a concurrent **Go** email validation service reducing backend load by **30%**.
- Created a Zapier-like event automation feature that triggers **200+** emails per event, reducing manual notification effort by **60%**.

Bizonance India Pvt. Ltd.

Jan 2024 – Dec 2024

Full Stack Developer

- Developed scalable applications using **React**, **Node.js**, and **PostgreSQL**.
- Migrated a legacy frontend to **React** + **Tailwind CSS**, improving performance by **20%**.
- Integrated the **PhonePe API** with secure transaction handling.
- Developed an **Electron** desktop application for synchronized **MongoDB** and **PostgreSQL** data management.
- Migrated the complete server from Windows to the Linux (Hostinger) hosting platform, cutting hosting costs by **30%** and improving uptime to **99.9%**.

PROJECTS

RSS Post Scraper in Go | GitHub

Go • Chi • PostgreSQL • Goose • sqlc

- Built an RSS feed scraper with database migrations and type-safe SQL generation.

Voice-Based AI Chat Application | GitHub

Next.js • Supabase • PostgreSQL • Vapi

- Developed a real-time AI voice assistant with streaming conversations and secure authentication.

Rulers of the Sky (Go + Ebiten) | GitHub | Live Demo

Go • Ebiten • Game Development

- Developed a retro-style 2D aerial combat game featuring sprite animation, scrolling backgrounds, enemy AI, projectiles, and collision detection using **Go** and **Ebiten**.
