PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience across the full software development lifecycle — requirements, design, coding, testing, deployment, and maintenance — building and supporting production applications in **Go**, **TypeScript**, and **React**. Solid grounding in computer science fundamentals: data structures, algorithms, object-oriented design, and concurrency. Ships backend services on **AWS**, **Azure**, and **GCP**, containerised with **Docker** and **Kubernetes**, delivered through **GitHub Actions** and **CI/CD** pipelines in **Agile** teams. Writes unit, integration, and system tests as part of the change rather than after it, takes part in code reviews, and documents technical designs and procedures. Uses **AI** to write code faster while keeping it clean, well-documented, and verifiable — and has shipped real AI-powered features.

SKILLS

Languages	Go, TypeScript, JavaScript, Python, SQL, Bash
Frontend	React, Next.js, Tailwind CSS, component design
Backend	Node.js, Express, tRPC, REST & GraphQL APIs, JWT/OAuth, microservices
CS Fundamentals	Data structures, algorithms, OOP, concurrency, goroutines, distributed systems, relational modelling
Cloud	AWS (EC2, Lambda, RDS, S3, ECR), Azure, GCP, VPC, IAM, SQS, API Gateway, EventBridge
Containers	Docker, Docker Swarm, Kubernetes, containerised deployments
CI/CD & Git	GitHub, GitHub Actions, GitLab CI, Jenkins, Docker, automated build/test/deploy
Testing	Unit testing, integration testing, system testing, TDD, code review, debugging & defect resolution
Practices	Agile, SDLC, technical design docs, code standards, code review feedback, documentation
AI-Assisted Dev	AI-assisted coding, testing and debugging, prompt design, output verification, LLM product features

WORK EXPERIENCE

Techsurvi Pvt. Ltd.

Nov 2025 – Present

Software Engineer

- Designed and developed backend services in **Go** and **Node.js**/**TypeScript** (**Express**, **GraphQL**) on **AWS**, holding average API latency at **150 ms**, with unit, integration, and system tests written alongside each change.
- Built and maintained **CI/CD** pipelines (**GitHub Actions**, **Jenkins**) covering automated build, test, container image, and deployment to **Kubernetes**, plus branch review and merge workflows on **GitHub**.
- Containerised services with **Docker** and **Docker Swarm**, and instrumented them with **Prometheus**, **Grafana**, and **Loki** so defects surface in production before customers report them.
- Developed a concurrent **Go** stress-testing service using **goroutines**, **mutexes**, and **wait groups**, improving availability by **60%**, and documented its design and operational procedure.
- Created event-driven architecture for a client using **AWS** (**Lambda**, **SQS**, **API Gateway**), handling 10K+ requests/day and reducing latency by **40%**.
- Created **AWS** billing alerts that kept monthly cloud spend within the **$5K** limit, preventing budget overruns.
- Migrated the **MySQL RDS** database from version **8.0** to **8.4** with zero downtime, improving query performance by **25%**.
- Created a **GDPR**-compliant webhook system using **SQS**, **Lambda**, and **EventBridge**, processing 5K webhooks/day with dead-letter handling and replay strategy.

Skyfunnel.ai

Dec 2024 – Oct 2025

Software Development Engineer

- Developed production backend services with **tRPC** and **PostgreSQL**, covered by automated unit and integration tests in an **Agile** sprint cycle.
- Assisted in troubleshooting and resolving software defects across the distributed stack — 100+ production issues resolved, resolution time down **40%** through root-cause analysis.
- Improved delivery reliability with exponential backoff retries and idempotent processing, and built a concurrent **Go** validation service cutting backend load **30%**.
- Created a Zapier-like event automation feature that triggers **200+** emails per event, reducing manual notification effort by **60%**.

Bizonance India Pvt. Ltd.

Jan 2024 – Dec 2024

Full Stack Developer

- Developed scalable applications with **React**, **Node.js**, and **PostgreSQL**.
- Integrated the **PhonePe API** with secure transaction handling and input validation.
- Delivered an **Electron** desktop app for synchronized **MongoDB** and **PostgreSQL** data management.
- Migrated the complete server from Windows to the Linux (Hostinger) hosting platform, cutting hosting costs by **30%** and improving uptime to **99.9%**.

PROJECTS

RSS Post Scraper in Go | GitHub

Go • Chi • PostgreSQL • Goose • sqlc

- Built an RSS feed scraper with database migrations and type-safe SQL generation.

Voice-Based AI Chat Application | GitHub

Next.js • Supabase • PostgreSQL • Vapi

- Developed a real-time AI voice assistant with streaming conversations and secure authentication.

Rulers of the Sky (Go + Ebiten) | GitHub | Live Demo

Go • Ebiten • Game Development

- Developed a retro-style 2D aerial combat game featuring sprite animation, scrolling backgrounds, enemy AI, projectiles, and collision detection using **Go** and **Ebiten**.
