PROFESSIONAL SUMMARY

Early-career Software Engineer building user-facing products across the **React**, **TypeScript**, and **Node.js** stack with **PostgreSQL**. Takes features from conception to launch, then iterates on them using customer feedback and data to improve activation and retention. Grounded in data structures, algorithms, and concurrent systems, and comfortable navigating ambiguity by breaking large problems into clean, shippable pieces. Works daily with **AI-assisted development** (**Cursor**, **Claude Code**) as a real collaborator — to think through designs, write and review code faster, and leave work others can build on. Customer-minded and pragmatic: picks the tool that delivers user value, not the one that trends.

SKILLS

Languages	TypeScript, JavaScript, Python, Go, SQL, Bash
Frontend	React, Next.js, Tailwind CSS, component architecture, state management, responsive UI, Electron
Backend & APIs	Node.js, Express.js, REST APIs, tRPC, GraphQL, JWT, OAuth, rate limiting, retries
Data	PostgreSQL, MongoDB, Redis, Prisma, Mongoose, sqlc, Goose, schema and query optimisation
Distributed Systems	Concurrency (goroutines, worker pools, channels), service design, caching, idempotency
AI & Developer Tools	Cursor, Claude Code, AI-assisted development and code review, LLM-integrated features
Cloud & Delivery	AWS (EC2, Lambda, RDS, ECR, CloudFront, S3), Docker, CI/CD, GitHub Actions
Observability	Prometheus, Grafana, Loki, Promtail, Node Exporter, cAdvisor
Engineering Practice	Unit and integration testing, code review, performance profiling, root cause analysis, technical documentation

WORK EXPERIENCE

Techsurvi Pvt. Ltd.

Nov 2025 – Present

Backend & DevOps Engineer

- Designed and shipped the backend architecture of a **Node.js** (**Express**, **GraphQL**) application on **AWS** (**EC2**, **Lambda**, **RDS**, **ECR**, **CloudFront**, **S3**), holding average API latency at **150 ms** so the product stayed fast as usage grew.
- Improved product and infrastructure reliability with **Prometheus**, **Grafana**, **Loki**, **Promtail**, **Node Exporter**, and **cAdvisor**, surfacing regressions before users reported them.
- Built automated **CI/CD** pipelines with **Docker**, **Docker Swarm**, and **GitHub Actions**, giving the team a safe, repeatable path from commit to production.
- Developed a concurrent **Go** service using goroutines, channels, mutexes, and WaitGroups, improving availability by **60%**.
- Created internal automation tooling that removed repetitive deploy and verification steps for the whole team.
- Created event-driven architecture for a client using **AWS** (**Lambda**, **SQS**, **API Gateway**), handling 10K+ requests/day and reducing latency by **40%**.
- Created **AWS** billing alerts that kept monthly cloud spend within the **$5K** limit, preventing budget overruns.
- Migrated the **MySQL RDS** database from version **8.0** to **8.4** with zero downtime, improving query performance by **25%**.
- Created a **GDPR**-compliant webhook system using **SQS**, **Lambda**, and **EventBridge**, processing 5K webhooks/day with dead-letter handling and replay strategy.

Skyfunnel.ai

Dec 2024 – Oct 2025

Software Development Engineer

- Built a concurrent **Go** email validation service using goroutines and worker pools, reducing backend load by **30%** and tightening a key onboarding path.
- Developed production backend services and **REST** APIs using **tRPC** and **PostgreSQL**, covered by unit and integration tests.
- Debugged and resolved **100+** production issues, reducing bug resolution time by **40%** through systematic root cause analysis and shared write-ups.
- Improved outbound **WhatsApp** and **Email** delivery with exponential backoff retries, increasing delivery success for end users.
- Created a Zapier-like event automation feature that triggers **200+** emails per event, reducing manual notification effort by **60%**.

Bizonance India Pvt. Ltd.

Jan 2024 – Dec 2024

Full Stack Developer

- Developed an **Electron** desktop application synchronizing **MongoDB** and **PostgreSQL** data across environments.
- Integrated the **PhonePe API** with secure transaction handling and input validation.
- Migrated a legacy frontend to **React** + **Tailwind CSS**, improving performance by **20%** and making the UI easier to extend.
- Developed scalable applications using **React**, **Node.js**, and **PostgreSQL**.
- Migrated the complete server from Windows to the Linux (Hostinger) hosting platform, cutting hosting costs by **30%** and improving uptime to **99.9%**.

PROJECTS

RSS Post Scraper in Go | GitHub

Go • Chi • PostgreSQL • Goose • sqlc

- Built an RSS feed scraper with database migrations and type-safe SQL generation.

Voice-Based AI Chat Application | GitHub

Next.js • Supabase • PostgreSQL • Vapi

- Developed a real-time AI voice assistant with streaming conversations and secure authentication.

Rulers of the Sky (Go + Ebiten) | GitHub | Live Demo

Go • Ebiten • Game Development

- Developed a retro-style 2D aerial combat game featuring sprite animation, scrolling backgrounds, enemy AI, projectiles, and collision detection using **Go** and **Ebiten**.
