PROFESSIONAL SUMMARY

AWS Cloud & DevOps Engineer with 3+ years of experience designing, implementing, and maintaining cloud infrastructure and CI/CD pipelines on **AWS**. Delivers scalable, secure, highly available infrastructure — **EC2**, **VPC**, **ELB/ALB**, **RDS**, **S3**, **IAM** — provisioned through **Infrastructure as Code** (**Terraform**, **CloudFormation**, **AWS CDK**) and automated **CI/CD** (**Jenkins**, **CodePipeline**, **CodeBuild**, **GitLab CI**). Runs containers with **Docker**, **Amazon ECS**, and **Kubernetes** (**EKS**); monitors and alerts via **CloudWatch**, **CloudTrail**, and **ELK**. Strong in networking — **DNS**, **TCP/IP**, **VPN**, load balancers, security groups, **NACLs** — cloud security (least-privilege **IAM**, encryption at rest and in transit), and serverless (**Lambda**, **API Gateway**). Automates with **Python**, **Bash**, and **Ansible**.

SKILLS

AWS	EC2, VPC, S3, IAM, ELB/ALB/NLB, RDS, CloudWatch, CloudTrail, Auto Scaling, Route 53, ECR, ECS, EKS, Lambda, API Gateway
IaC & Config	Terraform, CloudFormation, AWS CDK, Ansible
CI/CD	Jenkins, CodePipeline, CodeBuild, GitLab CI, CircleCI, GitHub Actions
Containers	Docker, Docker Swarm, Amazon ECS, Kubernetes, Amazon EKS
Scripting	Python, Bash/shell, PowerShell, Go, SQL, TypeScript
Networking	VPC, DNS, TCP/IP, VPN, load balancers, security groups, NACLs
Security	IAM policies & roles, least privilege, encryption at rest/in transit
Monitoring	CloudWatch metrics/alarms/logs, CloudTrail, ELK Stack, Prometheus, Grafana

WORK EXPERIENCE

Techsurvi Pvt. Ltd.

Nov 2025 – Present

AWS Cloud & DevOps Engineer

- Designed, deployed, and managed highly available **AWS** infrastructure (**EC2**, **VPC**, **S3**, **RDS**, **ELB/ALB**, **ECR**, **CloudFront**, **Lambda**) as code with **Terraform** and **Ansible**.
- Built, monitored, and improved **CI/CD** pipelines (**Jenkins**, **CodePipeline**, **CodeBuild**) covering build, test, image scan, and deployment of **Docker** workloads to **Amazon ECS** and **Kubernetes** (**EKS**).
- Implemented monitoring, logging, and alerting with **CloudWatch**, **CloudTrail**, **ELK**, **Prometheus**, and **Grafana**, cutting MTTD and MTTR.
- Applied cloud security best practices — least-privilege **IAM**, security groups, **NACLs**, encryption at rest/in transit — and automated provisioning and deployment with **Python** and **Bash**.
- Collaborated with development teams on deployment and performance tuning, and built a concurrent **Go** stress-testing service (**Goroutines**, **Mutexes**) that improved availability by **60%**.
- Created event-driven architecture for a client using **AWS** (**Lambda**, **SQS**, **API Gateway**), handling 10K+ requests/day and reducing latency by **40%**.
- Created **AWS** billing alerts that kept monthly cloud spend within the **$5K** limit, preventing budget overruns.
- Migrated the **MySQL RDS** database from version **8.0** to **8.4** with zero downtime, improving query performance by **25%**.
- Created a **GDPR**-compliant webhook system using **SQS**, **Lambda**, and **EventBridge**, processing 5K webhooks/day with dead-letter handling and replay strategy.

Skyfunnel.ai

Dec 2024 – Oct 2025

Software Development Engineer

- Built production backend services (**tRPC**, **REST APIs**, **PostgreSQL**) shipped via automated cloud **CI/CD** pipelines.
- Troubleshot infrastructure and deployment issues end to end — 100+ production incidents resolved, resolution time down **40%** via root-cause analysis.
- Improved reliability with exponential backoff retries and idempotent processing; built a concurrent **Go** service cutting backend load **30%**.
- Created a Zapier-like event automation feature that triggers **200+** emails per event, reducing manual notification effort by **60%**.

Bizonance India Pvt. Ltd.

Jan 2024 – Dec 2024

Full Stack Developer

- Developed scalable applications with **React**, **Node.js**, and **PostgreSQL** on cloud infrastructure.
- Integrated the **PhonePe API** with secure transaction handling.
- Delivered an **Electron** desktop app for synchronized **MongoDB** and **PostgreSQL** data management.
- Migrated the complete server from Windows to the Linux (Hostinger) hosting platform, cutting hosting costs by **30%** and improving uptime to **99.9%**.

PROJECTS

RSS Post Scraper in Go | GitHub

Go • Chi • PostgreSQL • Goose • sqlc

- Built an RSS feed scraper with database migrations and type-safe SQL generation.

Voice-Based AI Chat Application | GitHub

Next.js • Supabase • PostgreSQL • Vapi

- Developed a real-time AI voice assistant with streaming conversations and secure authentication.

Rulers of the Sky (Go + Ebiten) | GitHub | Live Demo

Go • Ebiten • Game Development

- Developed a retro-style 2D aerial combat game featuring sprite animation, scrolling backgrounds, enemy AI, projectiles, and collision detection using **Go** and **Ebiten**.
