PROFESSIONAL SUMMARY

Forward-Deployed Engineer and applied AI builder with 3+ years shipping production software in **Python** and **TypeScript**, including hands-on ownership of the technical relationship with customers and enterprise stakeholders. Comfortable owning the room: running discovery, reconciling conflicting signals from business owners, operators, and dashboards into one problem statement, writing the spec everyone agrees to ship, then building and integrating it myself. Practical agent depth — **prompt design**, **tool calling**, **RAG**, **MCP** tool specs, **eval** harnesses, and workflow automation wired into real APIs, **webhooks**, auth, and payment systems. Prefers ambiguous, high-context problems, measures outcomes against the metric that was meant to move, and kills what does not earn its keep.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL, Go, Bash
AI & Agents	Prompt design, tool / function calling, RAG, agent workflows, MCP tool specs, eval fixtures and harnesses, human-in-the-loop guardrails, LLM observability and cost tracking
APIs & Integrations	REST APIs, webhooks, OAuth and JWT auth, third-party API integration, rate limiting, retries with backoff, idempotency, data pipelines
Backend & Data	Node.js, Express.js, tRPC, GraphQL, PostgreSQL, MongoDB, Redis, Prisma, sqlc, Goose, schema and query optimisation
Frontend & Tooling	React, Next.js, Tailwind CSS, dashboards, internal tooling and prototypes shipped to real users
Cloud & Delivery	AWS (EC2, Lambda, RDS, ECR, CloudFront, S3), Docker, Kubernetes, CI/CD, GitHub Actions
Observability	Prometheus, Grafana, Loki, Promtail, Node Exporter, cAdvisor, LLM traces, token and cost-per-run monitoring
Customer & Delivery	Technical discovery, solution design, spec and plan writing, stakeholder communication, rollout reviews, post-launch support
Quality & Debugging	Unit and integration testing, production debugging, root cause analysis, eval-driven quality gates, technical documentation

WORK EXPERIENCE

Techsurvi Pvt. Ltd.

Nov 2025 – Present

Backend & DevOps Engineer

- Built and shipped the **Node.js** (**Express**, **GraphQL**) backend on **AWS** (**EC2**, **Lambda**, **RDS**, **ECR**, **CloudFront**, **S3**) with a **Kubernetes** runtime and **Docker** images, holding average API latency at **150 ms**.
- Designed and shipped **LLM agents** with prompt design, **tool calling**, and **RAG** over internal APIs, automating triage workflows and removing repetitive manual work.
- Owned technical discovery directly with product and business stakeholders — reconciled conflicting requirements into written specs, then delivered the working solution end to end.
- Built **eval fixtures** and success metrics before rollout, then tracked production outcomes and iterated on real failure cases.
- Instrumented production with **Prometheus**, **Grafana**, **Loki**, **Promtail**, **Node Exporter**, and **cAdvisor**, and automated delivery via **Docker**, **Docker Swarm**, and **GitHub Actions**.
- Created event-driven architecture for a client using **AWS** (**Lambda**, **SQS**, **API Gateway**), handling 10K+ requests/day and reducing latency by **40%**.
- Created **AWS** billing alerts that kept monthly cloud spend within the **$5K** limit, preventing budget overruns.
- Migrated the **MySQL RDS** database from version **8.0** to **8.4** with zero downtime, improving query performance by **25%**.
- Created a **GDPR**-compliant webhook system using **SQS**, **Lambda**, and **EventBridge**, processing 5K webhooks/day with dead-letter handling and replay strategy.

Skyfunnel.ai

Dec 2024 – Oct 2025

Software Development Engineer

- Built a concurrent **Go** email validation service using goroutines and worker pools, reducing backend load by **30%** and unblocking a customer-facing workflow.
- Developed production backend services and **REST** APIs using **tRPC** and **PostgreSQL**, covered by unit and integration tests.
- Debugged and resolved **100+** production issues across services and third-party integrations, reducing resolution time by **40%** through root cause analysis and shared write-ups.
- Hardened outbound integrations with **webhooks** and exponential backoff retries, raising delivery success and making failures recoverable.
- Created a Zapier-like event automation feature that triggers **200+** emails per event, reducing manual notification effort by **60%**.

Bizonance India Pvt. Ltd.

Jan 2024 – Dec 2024

Full Stack Developer

- Integrated the **PhonePe payment API** into a fintech product, handling **auth**, transaction integrity, and input validation for live payment flows.
- Developed an **Electron** desktop application synchronizing **MongoDB** and **PostgreSQL** data across environments.
- Migrated a legacy frontend to **React** + **Tailwind CSS**, improving performance by **20%**.
- Developed scalable applications using **React**, **Node.js**, and **PostgreSQL**.
- Migrated the complete server from Windows to the Linux (Hostinger) hosting platform, cutting hosting costs by **30%** and improving uptime to **99.9%**.

PROJECTS

RSS Post Scraper in Go | GitHub

Go • Chi • PostgreSQL • Goose • sqlc

- Built an RSS feed scraper with database migrations and type-safe SQL generation.

Voice-Based AI Chat Application | GitHub

Next.js • Supabase • PostgreSQL • Vapi

- Developed a real-time AI voice assistant with streaming conversations and secure authentication.

Rulers of the Sky (Go + Ebiten) | GitHub | Live Demo

Go • Ebiten • Game Development

- Developed a retro-style 2D aerial combat game featuring sprite animation, scrolling backgrounds, enemy AI, projectiles, and collision detection using **Go** and **Ebiten**.
