PROFESSIONAL SUMMARY

Cloud Software Engineer with 3+ years of experience designing, developing, and operating distributed backend services and production systems on **AWS**. Skilled in **Go**, **Kubernetes**, **Docker**, **NoSQL** databases, and **event-driven architectures**, with hands-on experience building high-availability **REST APIs**, **Kafka**-based messaging flows, and automated **CI/CD** pipelines. Comfortable owning services end-to-end, contributing to technical design and code reviews, and using AI-assisted engineering workflows to accelerate delivery and reduce production toil.

SKILLS

Languages	Go, TypeScript, JavaScript, Python, Bash, SQL
Cloud & Kubernetes	AWS (EC2, Lambda, RDS, ECR, CloudFront, S3), Kubernetes, Docker, Docker Swarm, Linux, cloud-native services
Event-Driven Systems	Kafka, MQTT, pub/sub messaging, event streaming, retries, idempotency, dead-letter handling, distributed systems
Backend & APIs	Go, Node.js, Express.js, REST APIs, GraphQL, gRPC, microservices, JWT, OAuth, high-availability API design
Databases	MongoDB, PostgreSQL, Prisma, Mongoose, schema design, query optimization, migrations, MySQL
DevOps & Observability	GitHub Actions, CI/CD, Git, Prometheus, Grafana, Loki, Promtail, Node Exporter, cAdvisor, SLOs, alerting
AI-Native Engineering	AI coding agents, AI-assisted design and code review, test generation, debugging, documentation workflows

WORK EXPERIENCE

Techsurvi Pvt. Ltd.

Nov 2025 – Present

Backend & DevOps Engineer

- Designed and operated distributed backend services in **Go** and **Node.js** on **AWS**, delivering **REST** and **GraphQL** APIs with **150 ms** average latency for high-availability workloads.
- Deployed containerized services with **Docker**, **Docker Swarm**, and **Kubernetes**-based deployment patterns, and automated build, test, and release through **GitHub Actions CI/CD** pipelines.
- Implemented centralized monitoring and alerting with **Prometheus**, **Grafana**, **Loki**, **Promtail**, **Node Exporter**, and **cAdvisor**, improving production incident detection and response.
- Built concurrent **Go** services using Goroutines, Mutexes, WaitGroups, and channels, improving availability by **60%** under load.
- Used **AI agents and AI-assisted workflows** for design review, code review, test generation, and documentation, reducing repetitive development toil.
- Created event-driven architecture for a client using **AWS** (**Lambda**, **SQS**, **API Gateway**), handling 10K+ requests/day and reducing latency by **40%**.
- Created **AWS** billing alerts that kept monthly cloud spend within the **$5K** limit, preventing budget overruns.
- Migrated the **MySQL RDS** database from version **8.0** to **8.4** with zero downtime, improving query performance by **25%**.
- Created a **GDPR**-compliant webhook system using **SQS**, **Lambda**, and **EventBridge**, processing 5K webhooks/day with dead-letter handling and replay strategy.

Skyfunnel.ai

Dec 2024 – Oct 2025

Software Development Engineer

- Developed production backend services using **Go**, **tRPC**, **PostgreSQL**, and **MongoDB**, supporting event-driven messaging and asynchronous processing.
- Resolved 100+ production issues across distributed services, reducing bug resolution time by **40%**.
- Enhanced **WhatsApp** and **Email** delivery using exponential backoff retry mechanisms and queue-based messaging patterns.
- Built a concurrent **Go** email validation service reducing backend load by **30%**.
- Created a Zapier-like event automation feature that triggers **200+** emails per event, reducing manual notification effort by **60%**.

Bizonance India Pvt. Ltd.

Jan 2024 – Dec 2024

Full Stack Developer

- Developed scalable applications using **React**, **TypeScript**, **Node.js**, and **PostgreSQL**, covering backend APIs and frontend delivery.
- Migrated legacy frontend to **React** + **Tailwind CSS**, improving performance by **20%**.
- Integrated the **PhonePe API** with secure transaction handling and reliable callback processing.
- Developed an **Electron** desktop application for synchronized **MongoDB** and **PostgreSQL** data management.
- Migrated the complete server from Windows to the Linux (Hostinger) hosting platform, cutting hosting costs by **30%** and improving uptime to **99.9%**.

PROJECTS

RSS Post Scraper in Go | GitHub

Go • Chi • PostgreSQL • Goose • sqlc

- Built an RSS feed scraper with database migrations and type-safe SQL generation.

Voice-Based AI Chat Application | GitHub

Next.js • Supabase • PostgreSQL • Vapi

- Developed a real-time AI voice assistant with streaming conversations and secure authentication.

Rulers of the Sky (Go + Ebiten) | GitHub | Live Demo

Go • Ebiten • Game Development

- Developed a retro-style 2D aerial combat game featuring sprite animation, scrolling backgrounds, enemy AI, projectiles, and collision detection using **Go** and **Ebiten**.
