PROFESSIONAL SUMMARY

Site Reliability Engineer with 3+ years of experience building developer tooling, cloud-native infrastructure, and reliable production services. Builds **agentic AI systems** with multi-step execution, **tool use**, **memory**, and guarded autonomous decision-making, integrating them into **CI/CD** and **observability** workflows. Hands-on with **Kubernetes**, **AWS**, **Go**, **Node.js**, and **Python**, with end-to-end ownership from prototype through secure, scalable production operation.

SKILLS

Languages	Go, Python, TypeScript, JavaScript, Bash, SQL
Agentic AI	Multi-step agents, tool calling, memory, autonomous workflows, human approval, guardrails, agent evaluation
Platform & Cloud	Kubernetes, AWS (EC2, EKS, Lambda, RDS, ECR, CloudFront, S3), Docker, developer platforms, AI workloads
CI/CD & Developer Experience	GitHub Actions, reusable pipelines, developer tooling, platform integrations, Git, Linux
Observability	Prometheus, Grafana, Loki, Promtail, Node Exporter, cAdvisor, alerting, operational telemetry
Reliability & Security	SLO/SLI, incident response, RCA, scalable systems, secure tool execution, rollout/rollback
Applications & Data	Node.js, Express.js, GraphQL, REST APIs, tRPC, PostgreSQL, MongoDB

WORK EXPERIENCE

Techsurvi Pvt. Ltd.

Nov 2025 – Present

Backend & DevOps Engineer

- Own developer tooling across **CI/CD** and **observability** using **GitHub Actions**, **Docker**, **Kubernetes**, **Prometheus**, **Grafana**, and **Loki**, helping engineers build, ship, and run services securely.
- Architect and operate **agentic AI workflows** with multi-step tool use, memory, and guarded autonomous actions, integrating agents into delivery and operational routines from prototype to production.
- Run cloud-native **Node.js** and **Go** services on **AWS** and **Kubernetes**, supporting reliable application and AI workloads while maintaining **150 ms** average API latency.
- Centralize production telemetry with Prometheus, Grafana, Loki, Promtail, Node Exporter, and cAdvisor, using operational signals to accelerate triage and reduce recurring developer toil.
- Developed a concurrent Go stress-testing application using Goroutines, Mutexes, and WaitGroups, improving availability by **60%** through system-level performance analysis.
- Created event-driven architecture for a client using **AWS** (**Lambda**, **SQS**, **API Gateway**), handling 10K+ requests/day and reducing latency by **40%**.
- Created **AWS** billing alerts that kept monthly cloud spend within the **$5K** limit, preventing budget overruns.
- Migrated the **MySQL RDS** database from version **8.0** to **8.4** with zero downtime, improving query performance by **25%**.
- Created a **GDPR**-compliant webhook system using **SQS**, **Lambda**, and **EventBridge**, processing 5K webhooks/day with dead-letter handling and replay strategy.

Skyfunnel.ai

Dec 2024 – Oct 2025

Software Development Engineer

- Built and supported production **tRPC** and **PostgreSQL** services and reusable backend tooling, taking engineering improvements from implementation to reliable operation.
- Resolved **100+ production issues**, reducing bug resolution time by **40%** through structured troubleshooting and root cause analysis.
- Improved **WhatsApp** and **Email** delivery reliability using exponential backoff retries, reducing recurring failures in developer-supported workflows.
- Built a concurrent **Go** email validation service that reduced backend load by **30%**, improving scalability and application performance.
- Created a Zapier-like event automation feature that triggers **200+** emails per event, reducing manual notification effort by **60%**.

Bizonance India Pvt. Ltd.

Jan 2024 – Dec 2024

Full Stack Developer

- Developed and maintained scalable **React**, **Node.js**, and **PostgreSQL** applications, solving application and data issues across the stack.
- Migrated a legacy frontend to React + Tailwind CSS, improving performance by **20%**, and integrated the **PhonePe API** with secure transaction handling.
- Developed an **Electron** desktop application for synchronized **MongoDB** and **PostgreSQL** data management.
- Migrated the complete server from Windows to the Linux (Hostinger) hosting platform, cutting hosting costs by **30%** and improving uptime to **99.9%**.

PROJECTS

RSS Post Scraper in Go | GitHub

Go • Chi • PostgreSQL • Goose • sqlc

- Built an RSS feed scraper with database migrations and type-safe SQL generation.

Voice-Based AI Chat Application | GitHub

Next.js • Supabase • PostgreSQL • Vapi

- Developed a real-time AI voice assistant with streaming conversations and secure authentication.

Rulers of the Sky (Go + Ebiten) | GitHub | Live Demo

Go • Ebiten • Game Development

- Developed a retro-style 2D aerial combat game featuring sprite animation, scrolling backgrounds, enemy AI, projectiles, and collision detection using **Go** and **Ebiten**.
