PROFESSIONAL SUMMARY

DevSecOps and Cloud Security Engineer with 3+ years securing and operating production cloud infrastructure on **AWS**. Hands-on with **IAM** least-privilege design, **VPC** networking (**peering**, **NACLs**, **security groups**, **VPN**, **private endpoints**), and AWS security services including **GuardDuty**, **Security Hub**, **Inspector**, **Config**, **CloudTrail**, and **WAF**. Builds secure **CI/CD** with **Terraform** and **CloudFormation**, hardens **Docker** workloads, reviews **API security**, and automates checks in **Python**, **Bash**, and **Perl**. Works closely with development and operations teams to embed controls without slowing delivery, with working knowledge of **GCP** security fundamentals.

SKILLS

Cloud Security	AWS (GuardDuty, Security Hub, Inspector, Config, CloudTrail, WAF, IAM, KMS, Secrets Manager, S3), GCP (IAM, VPC firewall rules, Cloud Audit Logs, Security Command Center)
Networking	VPC, subnets, route tables, VPC peering, NACLs, security groups, VPN, private endpoints, TLS
DevOps & IaC	Terraform, CloudFormation, Docker, Docker Swarm, Kubernetes, GitHub Actions, CI/CD, Linux, Git
Languages & Automation	Python (boto3), Bash, Perl, Go, TypeScript, SQL
Security Practices	Least privilege, threat detection, vulnerability management, secrets management, image scanning, SAST / DAST, OWASP Top 10, CIS benchmarks, patch management
API & Containers	OAuth2 / JWT, input validation, rate limiting, API gateway controls, container hardening, Kubernetes RBAC, network policies
Observability	CloudWatch, CloudTrail, GuardDuty findings, Prometheus, Grafana, Loki, Promtail, Node Exporter, cAdvisor
Collaboration	Security reviews, threat modelling, incident response, runbooks, technical documentation, Agile / Scrum

WORK EXPERIENCE

Techsurvi Pvt. Ltd.

Nov 2025 – Present

Backend & DevOps Engineer

- Hardened **AWS** accounts with least-privilege **IAM** roles and policies, **security groups**, **NACLs**, **private endpoints**, and **VPC peering**; enabled **GuardDuty**, **Security Hub**, **Inspector**, **Config**, **CloudTrail**, and **WAF** for continuous detection and alerting.
- Automated security remediation in **Python** (boto3) and **Bash** for public S3 buckets, overly broad IAM policies, unencrypted volumes, and stale access keys, routing findings into tickets.
- Built secure **CI/CD** pipelines with **GitHub Actions**, **Terraform** and **CloudFormation**, **Docker** image scanning, and secrets management.
- Secured **REST APIs** and **FastAPI** services with **OAuth2** / **JWT**, input validation, rate limiting, dependency scanning, and container hardening.
- Implemented centralized monitoring with **Prometheus**, **Grafana**, **Loki**, **Promtail**, **Node Exporter**, and **cAdvisor**, with alerts on availability and saturation.
- Created event-driven architecture for a client using **AWS** (**Lambda**, **SQS**, **API Gateway**), handling 10K+ requests/day and reducing latency by **40%**.
- Created **AWS** billing alerts that kept monthly cloud spend within the **$5K** limit, preventing budget overruns.
- Migrated the **MySQL RDS** database from version **8.0** to **8.4** with zero downtime, improving query performance by **25%**.
- Created a **GDPR**-compliant webhook system using **SQS**, **Lambda**, and **EventBridge**, processing 5K webhooks/day with dead-letter handling and replay strategy.

Skyfunnel.ai

Dec 2024 – Oct 2025

Software Development Engineer

- Secured production backend services and **REST APIs** using **Python** (**FastAPI**), **tRPC**, and **PostgreSQL**, adding authentication, input validation, and rate limiting.
- Resolved 100+ production issues across services and integrations, reducing bug resolution time by **40%** through root cause analysis.
- Hardened outbound **WhatsApp** and **Email** delivery with exponential backoff retries, and built a concurrent **Go** validation service reducing backend load by **30%**.
- Built **React.js** + **TypeScript** dashboards, shipping responsive interfaces for operations users.
- Created a Zapier-like event automation feature that triggers **200+** emails per event, reducing manual notification effort by **60%**.

Bizonance India Pvt. Ltd.

Jan 2024 – Dec 2024

Full Stack Developer

- Developed applications using **React**, **Node.js**, and **PostgreSQL**; migrated a legacy frontend to **React** + **Tailwind CSS** for a **20%** performance improvement.
- Integrated the **PhonePe API** with secure transaction handling, input validation, and secrets management.
- Developed an **Electron** desktop application for synchronized **MongoDB** and **PostgreSQL** data management.
- Migrated the complete server from Windows to the Linux (Hostinger) hosting platform, cutting hosting costs by **30%** and improving uptime to **99.9%**.

PROJECTS

RSS Post Scraper in Go | GitHub

Go • Chi • PostgreSQL • Goose • sqlc

- Built an RSS feed scraper with database migrations and type-safe SQL generation.

Voice-Based AI Chat Application | GitHub

Next.js • Supabase • PostgreSQL • Vapi

- Developed a real-time AI voice assistant with streaming conversations and secure authentication.

Rulers of the Sky (Go + Ebiten) | GitHub | Live Demo

Go • Ebiten • Game Development

- Developed a retro-style 2D aerial combat game featuring sprite animation, scrolling backgrounds, enemy AI, projectiles, and collision detection using **Go** and **Ebiten**.
